# How to Draw Rule of Thirds

1. Draw a square representing your design

2. Draw diagonal lines connecting the corners.

3. Draw a vertical line through the intersecting diagonal lines

4. Draw a second set of diagonal lines from the lower corners to the top of the centerline.

5. Draw a horizontal line through the intersection connecting the second set of intersecting points created by the two new diagonal lines.

6. Draw a vertical line through the intersecting point and the diagonal line from the vertical to connect the horizontal line from step 5.

7. Add the additional lines to complete the Rule of Thirds box.
